

The written exam part of Exit-Exam was given on Dec.31st of 2021 while the oral exam took place from January 4th up to January 6th of 2022.

Each student entered two stations; there were 3 teachers in each station.

Station B is where the Pharmacology, Microbiology and Pathology teachers were to examine a student about a case different from the one asked in station A.

1 student spent 30 minutes in each station.

A single student enters a station/class/. The teachers give him/her/ a paper which describes the signs and symptoms of a disease. The student is asked to identify/diagnose/ the case. Once the case has been identified, questions pertaining to the case are asked by each teacher. Once the teachers in a station are done asking questions, the student is sent to the next station to be examined about another case.
