

Question 1

Not yet answered

Marked out of 1.0

In neurological history taking peculiar to localization from the identification part is

Select one:

- ☐ a. Sex
- ☒ b. Handedness
- ☐ c. Age
- ☐ d. Name

Question 2

Not yet answered

Marked out of 1.0

Which of the following physical examination findings best describes lung collapse?

Select one:

- ☐ a. Mediastinal shift to the opposite, dullness and decreased breath sound
- ☐ b. Mediastinal shift to the opposite, resonant and decreased breath sound
- ☐ c. Ipsilateral mediastinal shift, resonant and decreased breath sound
- ☒ d. Ipsilateral mediastinal shift, dullness and decreased breath sound

Question 3

Not yet answered

Marked out of 1.0

Which respiratory condition is associated with dullness to percussion and increased tactile fremitus?

Select one:

- ☐ a. Lung mass
- ☒ b. Lobar pneumonia
- ☐ c. Plural fibrosis
- ☐ d. Plural effusion

Question 4

Not yet answered

Marked out of 1.0

Which one of the following is the indication for performing a pelvic examination in a pregnant woman

Select one:

- ☐ a. Labor
- ☐ b. For pelvimetry
- ☐ c. Early diagnosis of pregnancy
- ☒ d. All

Question 5

Not yet answered

Marked out of 1.0

Which of the following is NOT a cause of clubbing?

Select one:

- ☐ a. Interstitial lung disease
- ☐ b. Lung abscess
- ☒ c. COPD
- ☐ d. Lung cancer

Question 6

Not yet answered

Marked out of 1.0

Which one of the following is false concerning the physical examination of liver?

Select one:

- ☐ a. Liver size is generally larger in men as compared to women.
- ☒ b. The normal liver has blunted edge and nodular surface.
- ☐ c. A bruit over an enlarged liver is indicative of a possible hepatocellular carcinoma
- ☐ d. In cirrhosis the liver is usually enlarged and it has sharp edge and smooth surface.

Question 7

Answer saved

Marked out of 1.0

If you find a murmur between S1 and S2 with palpable thrill. Which of the following match with the time and grade of this murmur

Select one:

- ☐ a. Diastolic, grade 3
- ☒ b. Systolic, grade 4
- ☐ c. Diastolic, grade 1
- ☐ d. Systolic , grade 2

Question 8

Answer saved

Marked out of 1.0

Which nerve is being tested when the hand is placed on a flat surface, palm up and the thumb is raised against resistance?

Select one:

- a. Radial
- ☒ b. Median
- c. Ulnar
- d. None of the above

Question 9

Answer saved

Marked out of 1.0

Which one of the following organs is not considered part of the lymphatic system?

Select one:

- a. Thymus
- ☒ b. Liver
- c. Spleen
- d. Abdominal lymph nodes

Question 10

Not yet answered

Marked out of 1.0

Shoulder muscle asymmetry may indicate which of the following?

Select one:

- a. Adaptive hypertrophy
- ☐ b. Nerve injury
- ☐ c. Rotator cuff tear
- ☐ d. All of the above

Question 11

Not yet answered

Marked out of 1.0

Serum, blood or pus that has dried, accumulated on the surface is

Select one:

- ☐ a. Lichenification
- ☒ b. Crust
- ☐ c. Scale
- ☐ d. Excoriation

Question 12

Not yet answered

Marked out of 1.0

An Intern identified dullness on the left lower zone of the lung with accompanying crepitation and bronchial breath sound. What should be his clinical impression based on his findings?

Select one:

- ☐ a. Lung fibrosis
- ☒ b. Consolidation
- ☐ c. Pneumothorax
- ☐ d. Pleural effusion

Question 13

Not yet answered

Marked out of 1.0

Which one of the following is not true about the EDD

Select one:

- ☒ a. It is when we expect all pregnant women to deliver
- ☐ b. It is the 280th day after the LNMP
- ☐ c. It is the time where the GA is 40 weeks
- ☐ d. It is 9 months and 10 days from the LNMP

Question 14

Not yet answered

Marked out of 1.0

Jaundice could result from the following disease condition.

Select one:

- ☐ a. Colonic
- ☐ b. Pulmonary
- ☐ c. Gastric
- ☒ d. Pancreaticobiliary

Question 15

Not yet answered

Marked out of 1.0

Which of the following exams assesses fixity of breast mass to the chest wall

Select one:

- ☒ a. Examination with patient leaning forward
- ☐ b. Examination with patient's arm raised
- ☐ c. Supine examination
- ☐ d. Examination with patient's pressing the hip

Question 16

Not yet answered

Marked out of 1.0

Evidence based practice is the core of modern medicine. Which of the following has the highest level of evidence validity for clinical practice?

Select one:

- ☒ a. Randomized Controlled Trial
- ☐ b. Case Report
- ☐ c. Case Series
- ☐ d. Retrospective study

Question 17

Not yet answered

Marked out of 1.0

Which of the following statements defines a plaque lesion?

Select one:

- ☐ a. A fluid lesion (size <1cm)
- ☐ b. Any elevated lesion (>1cm diameter) which has a round surface (i.e. the thickness is similar to the diameter)
- ☒ c. A raised lesion where the diameter is much greater than the thickness (size >1cm)
- ☐ d. Flat lesion due to a localized color change only; the surface is normal (size <1cm)

Question 18

A type of disorder with predominant impairment in reality

Not yet answered

Marked out of 1.0

testing is

Select one:

- ☒ a. Psychosis
- ☐ b. Anxiety
- ☐ c. Somatoform disorder
- ☐ d. Mood disorder

Question 19

Not yet answered

Marked out of 1.0

Which of these does not lead to development of conjunctivae icterus?

Select one:

- ☐ a. Hepatitis
- ☒ b. Hypercarotenemia
- ☐ c. Hemolysis
- ☐ d. Choledocholithiasis

Question 20

Not yet answered

Marked out of 1.0

Which of the following is not true about inspection in abdominal examination?

Select one:

- ☐ a. Paradoxical movement of the abdomen during respiration is seen in patients with bilateral diaphragmatic paralysis.
- ☒ b. The presence of purplish striae is often a normal finding while whitish striae call for workup for possible endocrine disorders.
- ☐ c. Peri-umbilical and left flank ecchymosed may imply possible hemorrhagic pancreatitis.
- ☐ d. The presence of periumbilical visible veins draining away from umbilicus is indicative of possible portal hypertension.

Question 21

Not yet answered

Marked out of 1.0

The characters of venous pulsation include

Select one:

- a. Single wave pulsation
- ☒ b. Affected by patient's position
- ☐ c. Doesn't exist in a normal person
- ☐ d. Thick wall during palpation

Question 22

Not yet answered

Marked out of 1.0

A 24 year old smoking male presents to you with a 2 hour history of right sided chest pain. He claims that he was walking and suddenly felt chest pain and on examination of the chest he has hyperresonant and reduced air entry on the same side the most likely cause of this chest pain is

Select one:

- a. Pulmonary embolism
- ☐ b. Chondrochondritis
- ☒ c. Spontaneous pneumothorax
- ☐ d. Pericarditis

Question 23

Not yet answered

Marked out of 1.0

Repetitive behavior in response to an obsession is

Select one:

- a. Mannerism
- ☐ b. Tics
- ☒ c. Compulsion
- ☐ d. Stereotype

Question 24

One of the following is TRUE regarding the history of present

Not yet answered

Marked out of 1.0

illness.

Select one:

- ☐ a. Sexual history is included
- ☐ b. Complements past medical history
- ☐ c. Refers to one's occupation
- ☒ d. Explain the chief complaint

Question 25

Not yet answered

Marked out of 1.0

One of the following is NOT TRUE about musculoskeletal disorder:

Select one:

- ☐ a. Patients with malignancy may present with huge swelling and loss of function.
- ☐ b. Patients with Musculoskeletal disorders can be presented with Night pain.
- ☒ c. The site of pain always shows exactly where the site of pathology is.
- ☐ d. Patients with arthritis can be presented with joint stiffness and incapacitating pain.

Question 26

Not yet answered

Marked out of 1.0

Which of the following isolated lymphadenopathy is associated with intra-abdominal conditions and it is also called Virchow's node?

Select one:

- ☐ a. Left cervical
- ☐ b. Right supraclavicular
- ☐ c. Right cervical
- ☒ d. Left supraclavicular

Question 27
