|----|----------|----------------------------------------------------------------------------------------------------------------------------------------------------|------------------|-----------|------------|
| 1  |          | Blood, lymph, hematopoiesis                                                                                                                        | Prof. Mekibeb    | 7         | 4          |
| 2  |          | Immune system & Lymphoid organs; Blood cells and their development                                                                                 | Prof. Mekibeb    | 8         | 4          |
| 3  |          | Components, Characteristics, & Functions of Blood types, hemostasis                                                                                | Dr. Diresibachew | 8         | 4          |
| 4  |          | Heme & iron metabolism; plasma proteins & blood buffer system                                                                                      | Mr. Abdissa      | 7         | 4          |
| 5  | 29/11/21 | <b>Quiz-1</b>                                                                                                                                      |                  | <b>30</b> | <b>16</b>  |
| 6  |          | Blood disorders: anemia, sickle cell disease, bleeding disorders (hemophilia, blood clots)                                                         | Dr. Rahel Hailu  | 6         | 4          |
| 7  |          | Myeloproliferative disorders: Polycythemia Vera, Essential thrombocytosis, Primary or idiopathic Myelofibrosis, Chronic myelogenous leukemia (CML) | Dr. Tewodros     | 8         | 6          |
| 8  |          | Coagulants, anticoagulants & Antianaemic drugs                                                                                                     | Hailemeskel      | 8         | 4          |
| 9  |          | Introduction to the immune system; Innate immunity                                                                                                 | Dr. Adane        | 8         | 4          |
| 11 | 06/12/21 | <b>Quiz-2</b>                                                                                                                                      |                  | <b>30</b> | <b>18</b>  |
| 10 |          | Antigen capture and presentation to lymphocytes                                                                                                    | Dr. Adane        | 8         | 4          |
| 12 |          | Antigen recognition in the adaptive immune system                                                                                                  | Dr. Adane        | 6         | 4          |
| 13 |          | Cell mediate immune response; Effector mechanisms of CMI                                                                                           | Dr. Adane        | 8         | 4          |
| 14 |          | Humoral immune responses; Effector mechanisms humoral immunity                                                                                     | Dr. Tamrat       | 8         | 4          |
| 16 | 13/12/21 | <b>Quiz-3</b>                                                                                                                                      |                  | <b>30</b> | <b>16</b>  |
| 15 |          | Immunity to infections (viral, bacterial, fungal, protozoal & helminthes                                                                           | Dr. Tamrat       |           | 14         |
| 17 |          | Immune response against tumors and transplants (Microbiology)                                                                                      | Dr. Tamrat       |           | 10         |
| 18 |          | Immunoprophylaxis (Vaccines) & Immunotherapy (Microbiology)                                                                                        | Dr. Tamrat       |           | 10         |
| 19 |          | Hypersensitivity, Immunodeficiency and Autoimmunity                                                                                                | Dr. Yonas B      |           | 12         |
| 20 |          | Hematopathology: Haematological malignancies: Leukemia, Lymphomas, Myelomas                                                                        | Dr. Amanuel      |           | 12         |
|    |          |                                                                                                                                                    |                  |           | <b>58</b>  |
