

True/False Course Quiz

10.0/10.0 points (graded)

Keeping your phone on is a good way to stay focused on what you are learning in a class or lecture.

☐ True

☒ False

Answer

Correct:

Great job! In order to learn effectively, it is important to set any possible distractions aside. Turn off your phone or put it away where it won't distract you.

A person can give their attention to 2 or more things at the same time.

☐ True

☒ False

Answer

Correct:

It is impossible for any person to fully focus on 2 things or more at the same time. As a best practice our attention and focus should be on one thing at a time.

Taking notes is a good way to counteract the effects of our forgetful brain.

☒ True

☐ False

Answer

Correct:

Nice work! Our brain's working memory is limited in its capacity and so taking notes allows your brain to remember information better.

Active study techniques are useful in processing information learnt more thoroughly.

☒ True

☐ False

Answer

Correct:

Active study techniques force you to interact and engage with the text in deeper ways, therefore helping you to process the information more thoroughly.

As a student, your study space does not influence your ability to study effectively.

☐ True

☒ False

Answer

Correct:

Great job! As a student, your study area should help you study effectively so it is important to set up your optimal work space.
