

Reply of PC2 students for the question: Tips that you believe is important for PC1 students?

- 1, Ohh fellas it's gonna be a lil different from highschool. Prolly by now you know it, but the most important thing to do in PC 1 is to make sure you are ok mentally and ya form a routine
Take your time in learning how to learn medicine, it's a process. So be flexible and learn from your mistakes.
- 2, keep focused, find yourself some good and positive methods to relief your stress
Finishing the whole ppt one time is just a warm-up. You gotta revise it over and over. Don't question yourselves, you r not getting less smarter. You are just adapting. Don't stress yourself by comparing your studying pace with others.
- 3, Focus on your academics instead of extracurricular activities
- 4, They should revise the slides repeatedly and do previous exams
- 5, When in doubt, always choose D.
- 6, Manage ur time, have a good friend, pray
- 7, do questions a lot
- 8, Always finish the slides
- 9, Stay on campus. It's better for everything.
- 10, Learn how to learn!
- 11, don't engage in any extra curricular activities.. focus only on your study.
- 12, Discipline is the key . Waiting for a mood for reading doesn't work in med school .it's by Disciplining oneself , one can cover the syllabus. It's not only u who feels stressed, losses hope , thinks med school may not be the right choice ,doubts ur self and potential, .everyone feels the same it's just because they don't speak it out . Give ur self a to change nomatter how much u triedbefore . Never lose hope .u can restart anytime and get successful. Include other stuffs in ur routine. It will be a vent for u .it gets more stressful if all u have in ur life is medicine. Extracurricular engagements help a lot ..might be hobby, church, social life bla bla And afterall u're a human being not a doctor ..ur life has a lot to do more than being a doctor!
- 13, 1. Try your best to not listen and be influenced by others find your own rhythm and understand everyone is different 2. You don't always get good grades 3. Try your best so you won't regret it later
- 14, Avoid cramming study sessions and use your time effectively
- 15, It just keeps getting tougher so try and start doing your best kahunu!!! You'll end up in regrets when the once effort you were to lazy to put in (would've got you good grades) become meaningless in the later modules (you won't change much with the efforts). Have friends to talk to before you end up being stressed. Pray and behaymanotachu yalewn tesatefu. Find a friend whom you'll make study plans, ask quizzes and share information with eachother. DO QUESTIONS OF PREVIOUS YEARS (share the questions to one another 🤔). Kesr kesr anbbu cramming will fail you terribly trust me. Roughly go through previous year questions before studying (it makes you realize where to focus and all). Use youtube videos. Listen to fadil, longus, yewubar, zelalem, hailemeskel(smun kaltesasatku the WOW teacher) and habtamus(micro) recordings bedenb. And finally work for A+ but have a strong mindset not give up if things go south. Hold yourself together and stop obsseing about what happened bemagstu leketayu jemru. Eskemechereshaw TAGELU and normalize mental breakdowns 😂(it may happen once or twice) let it be and get over it. It only has power fit kesetachut. DONOT MISS EXAMS unless you have extreme cases.
Good luck
- 16, It is all about self governing then u can manage all the load and stress

17, Study consistently even if u are not feeling like studying

18, Be ur self

19, As a.pc1 student, one should prepare (equip) his/herself well to pay what it requires. PC1 is a long journey step in one's life nearly 13 months with many ups and downs. So, one should get ready mentally to accept this as a normal part human beings unless it may be difficult to even sustain in such situations. Hopefully, you don't take it wrong, just by thinking the journey is always challenging, a lot of bumps.....if you are committed and dedicated you can enjoy your stayings in PC1. An other thing I would like to rise is, one should be tactful, well informed and update his/her self to accomplish successfully in PC1 journey. Orienting or gravitating oneself to the most important issue is crucial point rather than leading oneself blindly.... Having life partner or significant others is very crucial.....Socializing too Never cease your routine you have developed overtime just by thinking as you don't have time....and like, manage time well.... Last, not least thing I wanna to put is... To be successful in PC1 journey(and in all journey of life),One should have good relationship with Creator, no matter how many different pathways to do so, one should do accordingly. For any issue, one can contact me via... demissie.beyene@aau.edu.et Thank You in advance!

20, Make sure to reach out if you're struggling.

21, Consistency and determination

22, Take things seriously

23, Time is your enemy...and don't fuckn waste it. plus have a positive attitude, make sure your friends circle is small and supportive, don't miss lecture class...read read read.

24, Just take it one step at a time u should not be concerned about what will happen in the module 4 or 6 while you are at module 1 ,try to give it all for each module and whatever the result just move to the next

25, Keep your focus to what matter. Take chance on other activities but don't miss out on the big picture which in our case is being well equipped medical student

26, Don't stress too much.you are going to sort out everything even if it is not today.

27, Nathnael, [3/18/2023 6:19 AM]

Module 4

1.YeTibebe- class lecture and slide I think beki new

2. Patho(Melat)- robbins(like always)

3. Healing and fracture- slide and Robbins

4. Fadil- class lecture and slide, also there is a book ketta yemitekemew(genetic disorder yemil) gn lefetena I don't think it's that necessary

5. Micro- slide I think beki new

6. Pharma- slide and katzung(or Goodman and Gilman)

Nathnael, [3/18/2023 6:19 AM]

Module 5

1. Epidemiology... slide bedenb kezia degmi topic topic eyefelegku ke3 metshafoch neber yemanebew; Gordis, Principles of Epidemiology, Epidemiology in medicine(a bit bulky gn bedenb lemeredat)
2. Biostat- slide and Daniel's(I love this book, brief and Important points) neber yemanebew

Nathnael, [3/18/2023 6:19 AM]

Module 6

1. Patho part- yaw slide and Robbins
2. Biochem part- yelast year yeTinsaen lecture and slide neber yanebebkut
3. Micro, Abel- class lecture, web, and slide
4. Micro, WeldeAregay- lecture and slide beki new I think
5. Fadil- same
6. Pharma- slide, lecture, and Katzung(Goodman and Gilman)

Wajana- slide ybekal

Nathnael, [3/18/2023 6:19 AM]

Module 7

Kahulum gra yagabagn yhe new. I still haven't figured it out 😞

1. histo- voice ena junqeira
2. Hana physio- slide yebekal I think
3. Tibebe- same
4. Rahel- literally yeRobbins shrt note new slidua
5. pharma HaileMeskel- voice, slide and yelast year yerasu slide
6. Adane ena Tamrat - I really have no idea. Kesew steyk gn they said slidochun bedenb kweb eyayu mnamn matnat 🧑🏿♀️ used Kuby as well.
7. Patho, Tewodros and Yonas- slide beki neber gn Robbinsm ale

Nathnael, [3/18/2023 6:19 AM]

Module 8

1. Histo- same

2. Embryo- slide and Moore and Langman, yaw slide beki new lefetena just bedenb lemeredat
3. Lower limb- slide and class lecture, aclang videos. Tnsh bcha topic eyefelegku Moore anbbe neber
4. Head and neck- slide, class lecture, aclang videos, tnsh Moore ende lower limb malet new(actually lehulum anatomy this is my style eskahun dres)
5. Biochem- yeTnsae slide and lecture
6. Physio- slide, lecture, and Guyton
7. Micro- slide I think beki new and ke Web search madrege andand pointoch
8. Patho- same(Robbins, slide and Fadil yaw Fadil new 🤗)
9. Pharma- same
